A habitat is the type of environment where a plant or animal lives. People live in many different habitats. Some live in big cities or in small towns. Some live in neighborhoods outside of cities. We call these areas the suburbs. Some people live in the country with lots of land around them but they do not grow plants or raise animals. Other people live on farms. They may raise animals called livestock and they may grow plants called crops.

Where do you live? Put a ☑️ in the box by the picture of the habitat that looks most like where you live.

BIG CITY
SMALL TOWN OR VILLAGE
COUNTRY

People and animals need shelter. What type of shelter do you live in? Put a ☑️ beside the shelter you live in.
